## DESERET EVENING NEWS

WEATHER REPORT.

Observation taken at 6 a. m. today for

previous 24 hours.

Salt Lake City, Utah; Barometer 25.70 fnches; current temperature 31; maximum temperature 38; minimum temperature 31; mean temperature 34, which is 4 degrees above normal.

Accumulated excess of temperature since January 1st, 164 degrees.

Total precipitation from 6 a. m., to 6 a. m., trace. previous 24 hours.

a. m., trace.
Accumulated deficiency of precipita-

tion since January 1st, .28 inch. FORECASTS TILD 6 P. M. SUNDAY

Local forecast for Salt Lake City and Fair tonight and Sunday; continued

Forecast made at San Francisco for Fair tonight and Sunday; colder to-night in northern portion.

WEATHER CONDITION.

Pressure has risen over the country west of the Rocky Mountains, the crest of the "high" extending from the Paof the "high" extending from the Pacific northwest to the great basin. The "low" has moved rapidly eastward and now forms a trough extending from the upper lake region southwestward to Oklahoma. Precipitation has fallen over southern California, Arizona, Utah, Colorado, New Mexico, the lower Mississiphi valleys Missouri and upper Mississippi valleys. It is colder over southern Utah and northern Arizona, and warmer over Texas, the Missouri and Mississippi

L. H. MURDOCH, Section Director.

TODAY'S TEMPERATURE.

10 a. m., 24; 12 noon, 35; 2 p. m., 38; 3 p. m., 37.

#### LOCAL BRIEFS.

Judge Hall has given his decision in the case of M. A. Beackstead vs J. S. Jones, and J. C. Homer, intervenor, which resulted in the intervenor getting session of 432 sheep, or their value,

If the author of the story, "Once Upon a Time," who signed the initials J. L. J., or J. Q. J., for the Christmas "News" competition, will call at the "News" office, he will learn something to his advantage. to his advantage.

The question of extending aid to the amount of \$800 to the Veteran Firemen towards the erection of their new home Canyon Road came up before the municipal finance committee last night. It is believed that a favorable report will be made by the committee, and that the valiant old fire fighters will receive the assistance they so much need.

Next Monday evening, at 8 o'clock the third lecture of the series given in the Latter-day Saints' College by Prof. Mills, will be delivered on the subject, "Book of Mormon Geography." Mr. H. S. Ensign will sing a solo, All are invited to attend. The lecturer will indicate the travels of the ancient Americal peoples by means of maps.

Louis King, the 15-year-old son Bishop C. L. King of Coyoto, Garnerd county, who has been at the Holy Cross ospital since Januar will be taken ome. The operation to relieve paralysis of the lower portion of the lad's body, caused by a bullet wound in the spine, accidentally made by a young friend while out hunting, has not been successful.

Tooele Transcript: Last week Salt Lake City broke the world's record as a historical center. Two legislatures, two cattle conventions, three mayors, a cattle show, a poultry show, a cow-boy band, a band of cowboys, sixteen cheap sales of shoddy overcoats, the arrest of one cattle king as a Chicago and a lecture on Greek fables by the Tribune editor.

The burning of the mill of the Menan Milling company at Menan, Idaho, noted in the dispatches recently, will be a severe loss to the people of that one, and is said to have been worth with its contents, \$20,000. It was insured for \$6,000 at Boise. A policy \$9,000, formerly carried with Grant & of this city, was allowed to lapse during November last.

President W. J. Tucker of Dartmouth college intends to visit Denver shortly, and college men here hope to be able to induce him to extend his trip to Salt Lake. President Tucker is visit to attend a banquet given for him the alumni of Dartmouth from Colora-do, Utah, Idaho, Wyoming and other Western States and Territories. He will deliver the lecture, "The Dart-

mouth of Today.' The Los Angeles Post, with commen dable enterprise, has issued a "Salt Lake City edition," generously flius-trated with views of a local nature. A considerable number of copies have been received here and will be read with interest. The Post says many kind things of Salt Lake and Sale Lake people, and trusts that the union of the City of the Angeles and the City of the Saints will be made speedy and complete.

Master Commissioner S. H. Lewis, of the Union Light and Power company, yesterday turned over the deed to the property and franchises of that com-pany to the Utah Light and Power company, which was recently sold at court, and bought in by the latter com-pany, who are the successors of the Union Light and Power company. The consideration of the deed was \$100,000, which was filed with County Recorder

Alston yesterday afternoon for record. Only five new cases of smallpox were The names of the afflicted parties are as follows: Carl A. Carlquist, living at 521 south, Fourth West street; Doris Mansfield, at room 3 Barrows block; Anna T. Taylor, at 49 south, First West and Mary Emery, at 44 north, street, and Mary Emery, at 44 north, Eighth West street. There were no Eighth West street. shildren that presented themselves yes-terday for vaccination. The day pre-

which indicates that the rush is over and that vaccination is about ended.

Robert Fowler has bought the horse nat Vice President Roosevelt rode Robert Fowler has bought the horse that Vice President Roosevelt rode while in Salt Lake last fall, for \$350, from Peery Clark of Wocd's Cross. The animal, a Kentucky thoroughbred, is an eight-year-old bay gelding, and is acknowledged to be one of the best-trained and best-gaited saddle horses in Utah. Holger, the standard-bred eight-year-old bay mare owned by H. W. Brown, was sold yesterday to Mrs. M. A. Dudley, of the Walker House, for \$300, Holger is exceptionally gentle, and yet has a record of 2:2314.

The Microscopical Society of Utah

The Microscopical Society of Utah and many members and visitors were present in the offices of Dr. Wilcox. Dr. Wilcox delivered an illustrated address on mosquitoes and disease. Prof. Or-son Howard of the University followed with an illustrated address on cells and cellular structure, and Dr. Talmage concluded the meeting by commending the microscope to the use of all inputs the microscope to the use of all intelli-gent persons. He also gave ; little talk with illustration on microscopes. The addresses were all interesting and in-structive, and the interest manifested by those present clearly shows that the work of this society is more appreciated than ever before,

Thursday evening Salt Lake Valley Lodge No. 12, A. O. U. W., had its annual meeting for the installation of officers and at the conclusion of the ceremonies, which were open to the public, there was a smoker at which everal speeches, as to the good of the order the fine condition of the edge were made. These are he officers of the lodge installed last evening: Past master workman, Thomas Allen; master workman, George Lucas; foreman, J. A. Ferbrache; overseer, G. A. Tuckfield; recorder, Joseph S. Darke; financier, Edgar Howe, receiver, Joseph W. Taylor; guide, W. A. Hilton; inside watchman, Chercles B. Bergh, outside, watchman Charles F. Barch: outside watchman, C. Hoffman; medical examiners, A. S. Bower and A. C. Ewing.

THE NEW SUGAR FACTORY. It Will be Built by the Oregon Sugar Company.

Hon. David Eccles was in the city this norning arranging with the railroads for the shipment of the iron and steel for the new sugar factory contemplated near Logan. In answer to a "News" representative, he stated that the new factory would be built by, and from part of the property of the Oregon Su-gar Factory, which already operates a plant at La Grande, Oregon, principally owned by Mr. Eccles. The capital stock of that company is \$400,000, and another \$400,000 of its stock will be issued to build the new factory in Logan. Mr. Eccies was asked whether the stock subscription books would be opened to the public, and his answer was no, that all the stock was practically taken now. It is understood that Mr. Eccles and his associates have taken the larger part of the stock, but that some sub-scriptions will be reserved for Cache county people. Mr. Eccles stated that location of the factory had not yet been determined upon, but he would go to Logan Monday when that point would be settled. The intention to break ground in the immediate future and to have the factory in full operation by the time the beet crop of next year is ready.

## MRS. FORD'S FUNERAL.

Will be Held from St. Mary's Cathedral Tomorrow Afternoon.

The funeral of Mrs. John D. Ford, who died yesterday after a two weeks' who ded yesterday illness, will be held from St. Mary's cathedral on Sunday, at 2:30 o'clock. The end came after a severe struggle with the grim destroyer and the news f her demise will bring sorrow to the earts of a host of friends who have known her through the many years she has lived in the west. Mrs. Ford was born in Ireland in 1837, and came to America as a mere child. In 1869 she made her home in Gold Hill, Nev., where she met John D. Ford, whom she subsequently married.

where she met John D. Ford, whom she subsequently married.

In 1883 they came to Salt Lake and engaged in the hotel business and since that time the name of "Ford's" has been a synonym for all that was excellent in hotel management and hospitality, the exceptional business ability and energy of Mrs. Ford making the and energy of Mrs. Ford making the different establishments over which she has presided amongst the most popular in the city. Besides these qualities Mrs. Ford was well known for her traits of sympathy, charity and kindness, her heart being ever open to the call of the needy or distressed. She was the dispenser of numberless charities of which nothing will ever be known, and the good deeds of which and energy of Mrs. Ford making the

be known, and the good deeds of which others told are enough to make her life remembered with affection and esteem by those who best knew her. Of relatives she leaves a husband and

son to mourn her loss.

The hotel, it is said, will pass into the hands of her son William Ford who will conduct the establishment as be

## PAINFUL INCIDENT.

University Instructor Develops Signs of Temporary Mental Deraugement.

The students at the University yes terday afternoon were considerably startled by Alfred T. Bond, instructor terday afternoon was startled by Alfred T. Bond, instructor in manual training, while conducting one of his classes in shop work, developing symptoms of mental derangement. As a consequence the painful news spread over the city that the professor had suddenly become demented. The incident happened during a session of one of the classes. Mr. Bond was addressing the pupils upon a subject, when all of a sudden he started out to talk incoherently to some mechanical devices in a manner that startled his auditors and had the effect of creating an incipient panic in the ranks of the class. Later he talked in a rational manner, and to all intents and purposes was apparently as well mentally and

was apparently as well mentally and ohysica ly as anyone. In explanation of the unfortunate vent it is stated that Mr. Bond has vent it is stated that Mr. Bond has seen fasting for several days at a time t different periods recently; he has al-o been working upon a mechanical ontrivance in which he is interested, he two together, it is thought, have ution and nerves, and this mental and physical application has had the effect of resulting in temporary exhaustion which will undoubtedly be overcome just as soon as the patient has had rest

fust as soon as the patient has had rest and rest peration.

Mr. End was born and reared in Heber City. He is a graduate of the University Normal school and the Chicago normal school. He has taught manual training at the University for four years past and has always been held to be one of the brightest men in his srecialty in the State. His wife and infant child are at their home in Heber, and Mr. Bond, following the advice of Dr. Wilcox, this morning ween to Weber for a few days' change and to Weber for a few days' change and

# GREAT SALT LAKE WILL RISE AGAIN.

Important Official Announcement by Government Agent, That Runs Contrary to Views of Many Scientists.

"The climate of the Great Salt Lake Basin is not changing. The average precipitation for the next fifty years will agree very closely with the average for the past fifty years. Periods of heavy precipitation will occur again and following them the lake will rise to about the same levels reached by it in the past."-J. H. Murdoch, Section Director Utah Weather Bureau. 

After a careful study of precipitation | in the lake level would naturally After a careful study of precipitation, and a fall of about 9 feet and 11 inches occurred. The fall was from a maximum of about 9 feet 2 inches in Section Director Murdoch, of the Utah vults in official form. A glance at the the close of 1900. detailed information is most interesting. Said Mr. Murdoch to the "News:"

"I undertook the work several months ago on account of the agitation in the public mind as to whether or not the Great Salt Lake was drying up, with the likelihood of ultimate disappearance altogether I made a particular study of precipitation data and am now convinced that the lake will not disappear, and that we will soon have another period of heavier precipitation, One that will cause a gradual rising of the lake until it will probably show as high a record as any time within the past fifty years. We have had fifteen years of unusually dry weather. There is no reason to believe, however, that it will continue for indications are dewill continue for indications are deit will continue for indications are de-cidedly to the contrary. Another thing, the lake has not failen, in my opinion, as the result of increased irrigation in the great basin to any marked extent. The fact is irrigation cuts only a small figure. A normal amount of precipita-tion will undeubtedly restore the lake tion will undoubtedly restore the lake to a normal height." Mr. Murdoch's findings are embodied

in a report to the government entitled "Relation of the Water Level of Great Salt Lake to Precipitation." It is as

#### PRECIPITATION.

On December 31, 1900, the water level On December 31, 1900, the water level of Great Salt Lake was 9 inches below the zero of the scale, measured on the gauge at Garfield Beach. This gauge was established many years ago by the U. S. Geological society, and its zero placed at what was believed to be one foot below the lowest known water. Many old settlers claim, however, that one foot below the lowest known water. Many old settlers claim, however, that the water was lower in 1848 than the point accepted by the officials of the U. S. geological survey as the lowest known level. In 1848 there was a dry bar extending from the mainland to Apbar extending from the mainland to An-telone Island. In September of 1900 this bar was again exposed, and since then it has been possible to drive or walk to the island dry shod. There can be but little doubt that the heading of minus 9 inches in the lowest water level reached since the settlement of the State.

WILL LAKE DISAPPEAR? The question naturally arises, What

s the cause of this remarkable fall in the lake, and will it continue to fall and finally disappear within a few

One explanation offered is that the fall is due to the diverting of large quantities of water from the quantities of water quantities of water the lake streams flowing into the lake With from the irrigation purposes, With view to ascertaining how shortage in precipitation is responsible for this decline in the lake level, all the precipitation data collected in the Great Salt Lake basin was tabulated and the averages calculated and compared. But it was seen that objection could be raised to any conclusions drawn from these averages for the reason that the average annual rainfall of the basin ranges from less than five inches in the driest parts to about eighinches in the driest parts to about eighteen inches where the precipitation is heaviest, and as stations have been established here and discontinued there, it was seen that the data was not comparable. Nevertheless the results of these calculations and comparisons show that the last fifteen years have been the driest on record.

THREE STATION RECORDS.

The precipitation data for Salt Lake City, including that for Fort Douglas, are complete back to 1865, with the exception of the data for 1866. The data for Ogden and Corinne are complete back to and collections. back to and including 1871. These stations lie a few miles east of the lake and the distance from Corinne on the north to Salt Lake City on the south is about 55 miles. The data for these sta-tions were tabulated, averages obtained tions were tabulated, averages obtained for each year and the results charled. The average annual precipitation for these thick stations from 1863 to 1990, inclusive, is 14.65 inches. The last decline in the water level of the lake occan in 1887. The average precipitation from 1863 to 1885, inclusive, is 15.32 inches, while the average from 1886 to 1900, inclusive (fifteen years), is only 13.67 inches, which is 98 inch below the average for all years and 1.65 inch be ow the years, and 1.65 inch be ow the average for the preceding twenty-three years. The year 1886 has been included with those following because it was a decline in the precipitation that year which caused the lake to fall the following year. Of course, the average for the entire period gives the best nor-mal and, as the comparison of the average for the last fifteen years with this normal shows an average shortage of .88 inch for each year, the total shortage for the fifteen years ending 1900 is 14.70 inches. With a shortage of 4.70 inches in rainfall, a decided fall , the past.

weather bureau, today gave out the re- 1886 to a minimum of minus 9 inches at AVERAGE PRECIPITATION.

The average precipitation for the fifteen years preceding 1886, or from 1871 to 1885, inclusive, was 14.24 inches, which is .57 inch greater than the average for the fifteen years ending 1900, but .41 inch below the normal. The average for the eight years from 1863 to 1870, inclusive approximating the precipitation of 1866 at 22.25 inches, is 18.22 inches, or 3.57 inches above the normal. The wettest fifteen consecuyears were those from 1864 1878, inclusive, with an average 17.14 inches, and during this period the lake rose to a maximum height of about 13 feet 5 inches in 1868,

fell to a minimum of about 6 feet in 1874, and reached a maximum height of about 12 feet 5 inches in 1876. The rise of 1868 was preceded by 28 inches of rainfall in 1867, and the rise of 1876 by 20.45 inches in 1875.

IS BASIN GETTING DRIER.

The question now arises, is the climate of the Great Salt Lake basin becoming drier? In connection with this subject, the following extract from a paper by Professor Willis L. Moore, chief United States weather bureau,

will be instructive: 'I have known intelligent and truthful men to publicly declare that they knew, from personal recollection, that the climate of their particular places of residence had changed since they were boys; that they had reliable land marks to show that the streams were drying up; that the precipitation was growing less, and that the winters were becoming milder, notwithstanding the fact that carefully taken observations of temperature and rainfall for each day for the previous hundred years showed no alteration of climate at such places. Of course, wide variations, sometimes extending over periods of several years, had occurred, but a deficit at one time was made up by an excess at another. To be sure changes must have taken place during geological periods; but these have been so slow that it is doubtful whether man in his civilized state has occupied the earth long to discover an apprec quantity. Quite accurate records of the opening of navigation in the rivers of Europe and of the time of vintages for five hundred years show no changes in the average data of the first ten years as compared with the average of the last ten; and the date paim, the vine, and the fig tree flourish as luxuriantly today in Palestine as they did in the days of Moses. Dried plants have been taken from the mummy cases of the Pharaohs exactly similar to those now growing in the soil once trod by those accident monarchs.

The matter of the change of climate is very important to our subarid West, to the States whose normal rainfall is just enough to produce a profitable crop. Some years ago, when the tide of immigration was strong, there were of immigration was geton, then average rainfall in regions that theretofore had had little rainfall for profitable agriculture. These two conditions were accidentally coincident; but the fact resolubly gave rise to the theory that robably gave rise to the theory that ivilization brings an increase in precip-tation. It was thought that the breaking of the virgin soil, making it more permeable, and thereby conserving the scant deposit of moisture; the planting of trees and the propagation of vegetation, by restricting the run off and by drawing up, the moisture from below confirmed the ground though roots. of the ground though roots the enormous quantities of aqueous va-por injection into the air by combustion ncident to a teeming population—had all combined to increase the rainfall all combined to increase the subarid plains more and to render the subarid plains more responsive to the efforts of the hus-bandman. No one with even a spark of that fellow feeling which "makes us wondrous kind" can fail to regret that this theory is not founded upon fact. But a moment's thought will indicate to the physicist that the volume of superincumbent air is so great, and capacity for moisture so enormous, that the additional vapor of water evaporated as above described, great though it be, is ineffectual to change appreciably the amount of rainfall which nature beforehand had ordained should be pre-

The size of continental areas, the topography of the land surface, the proximity of large bodies of water, an the direction of the prevailing winds, re all factors in determining the precipitation of a region; and it is probable that the feeble efforts of man will never be able materially to modify the result.

CLIMATE NOT CHANGING. The climate of the Great Salt Lake basin is not changing. The average precipitation for the next fifty years will agree very closely with the average for the past fifty years. Periods of heavy precipitation will occur again and following them the lake will rise to about the same levels reached by it in

## THE UPS AND DOWNS OF MERCUR

striking illustration of the ups and downs of a typical mining camp, says Eugene B. Palmer in Ainslee's. Many years ago the Indians there were supreme. Arrowheads and other relics picked up near the site of Mercur indicate that the trbes have at times contested among hemselves for that supremacy with these hills as a back-

ground. "In 1870 silver was discovered on this site, and two years later the Carrie Steele mine took about \$83 000 in three months, and the Camp Floyd boom reached to its height. Lewiston sprang up almost in a day where Mercur now stands. The town was in a fever, There were rich strikes, shootings, wild carousals and claim jumpings. The Mor-

"The story of Mercur, Utah, is a | a fort and battles for its possession were frequent, "Then the bottom dronned out. The was deserted.

pick and blast were gone from the deep recesses. Bats fluttered unmolested about the rotting timbers. Coyotes slunk into the tunnels and from this vantage ground howled defiance at the fierce wind of winter. For a time the spectral buildings stood gloomily on spectral buildings stood gloomily on their stilts, their paneless windows staring vacantly into desolate heaps, to be swept away later by fire.

'In 1880 only one house was left in the entire canyon. There lived soli-tary Moses Manning, keeping up as-sessment work on a few claims. In 1881 Arie Pinedo thought he had found quicksilver in the old camp. He staked out a claim and named it Mercur. But the mercury never paid to develop the claim. In 1883 gold was found in assays, but it could not be extracted. A few men became interested and carmon Chief mine was transformed into ried on mining in a desultory way

was sold as a 'gold brick' to a party of Nebraska 'tenderfeet.' For years they worked away. Ore was to be found in plenty and the assays showed large amounts of gold. But every process they tried brought no results in ex-tracting the precious metal. They ex-hausted their capital, and in 1893 they vere \$50,000 in debt and at the end of their rope Gilbert Reyton, one of the owners

without success. The Mercur claim

who was a Nebraska druggist, visited the mine. Going through the drawers of the office desk he came upon a pamphlet which had been sent to the foreman. It was a brief description of the cyanide process, then new in Amer-ica. With his druggist's experience, Peyton had no difficulty in mixing a eyanide solution and testing it in a cyanide solution and testing it in a cupel with some pulverized ore. But the solution did not seem to percolate the powdered ore, and the experiments were failures. Sick at heart. Peyton left in the cupel a solution with which he had been making tests until it was much diluted, and went to bed. The next merning he noticed that the weakened solution had penetrated the clay cupel cupel 'If the weak solution will go through

clay like that it ought to go through large pieces of ore, he reasoned.

The problem was solved. A weak solution and larger pieces of ore were tried, and the process worked like a

charm.
The owners of the Mercur mine were transformed into rich men. Moses Manning, the patient hermit, made \$15,-10.7. The town of Mercur sprang up, phoenix-like, and is today one of the richest gold camps in the United States.

## SOCIAL AND PERSONAL.

Mrs. Frank B. Stephens will give an impromptu musicale this evening.

Mrs. John Sharp entertains at cards this evening in honor of Mr. and Mrs. Joseph Sharp.

Miss Adelaide Mason entertains the German club this evening. The puipls of Miss Mary Olive Gray

gave an enjoyable musical recital at Gordon hall this afternoon. The ball given by the University stu-

dents at Christensens last night was a delightful affair. The hall was pret-tily decorated, the music was all that could be desired, and a jarge number enjoyed the pleasant affair. Present Were: Misses Florence Groesbeck, Louise

Nelden, Emma Carter, Mabel Harker, Messis, LeRoy Sanders, R. W. Glendinming, Sadler, Romney, Chaperones—Mrs. A. W. McCune, Jr., Mrs. E. V. McCune, Mrs. Henry Sadler, Mrs. Kingsbury, Mrs. F. Ferguson, Besides those mentioned above there were present the Misses Edna Brown, Emma Savage, Ella Jackson, Tessie Williams Savage, Ella Jackson, Jessie Williams, Lottle Marcroft, Edith Whittemore, Lillie Young, Lucile Young, Vera Cannon, May Biland, Libble Yearsley, Carter, Emma Hamlin, Effic. Rowe, Amy Rowe, Atten Kimball, Anna Hatch, Mr. C. L. Berry, Nellie Hailey, Jensey, Lensey, of Ogden, Grace Cannon, Jensen, Young, Rubey Knowlton, Anna Regus, Pearl Perry, Nelle Perry, Via Clark, Dora Brimon, Ellis Shipp, Angle Holbrook, Sharp, Ethel Saville, Veds Thatcher, McLelland, Margarete Donnellan, Winnie Alexander Ray; Messrs, Will Sparks, Ab. Hatch, Lin. Simmons, Holger Jensen, Harry Kimball, Adrian Penbroke, Thorwald Jensen, Hardy, Will Dunn, V. Strange, Steuart, Moore, Leland Swaner, Walt, Romney, Alma Nelson, Will Grimsell, Chas. Walton, Nelson, Will Grimsell, Chas. Walton, Charlle Billings, Frank Chamberlain, Will Keating, L. F. Hammell, M. McAl-Will Keating, L. F. Hammel, M.
